Fatih İnşaat

"İdris Türk önderliğinde, 1998 yılından itibaren gelişerek faaliyetlerimizi sürdürdük. Müşteri memnuniyetini her zaman ön planda tutup, zamanlama, kalite ve maliyet konularına önem verdik ve sektördeki tüm gelişmeleri hassasiyetle takip ettik.

Çağdaş yapı teknolojisinde dahi, kaba inşaatı tanımlayan kalıp, demir, beton işinin, binanın iskeleti olduğunu bilerek en iyi şekilde işleyip, önemli ve ses getiren projelerde yer aldık. Özellikle yüksek yapılar / kuleler konusunda uzmanlaştık.

Tüm projeleri zamanında hayata geçirebilen teknik kadromuz ve deneyimlerimizle, "Çıraklığını bilmediğin işin, ustalığını yapma" sözünü ilke edindik. Bu anlayışla çalışmalarımızda devam ederken, anahtar teslim konut işlerine girdik ve her zaman kalite, güven ve huzurun adresi olmayı başardık.

Sizlerle de yeni projelerimizde görüşmek, tanışmak ve sabit adresiniz olmak dileğiyle..."

Fatih Construction

We have continued our operations by growing and developing since 1998 under the leadership of İdris Türk.

Fatih Construction has always considered the customer satisfaction as the key priority and given importance to timing, quality and cost-efficiency and closely followed up the developments in the sector. We have especially become an expert about high buildings & towers.

We have marked significant and barnburner projects by being aware of the fact that the framework, iron and concrete work, which defines the rough construction even in the modern building structure, is the main frame of the building, and performing this work in the best manner.

With our business experience and technical staff that could implement all projects in a timely manner, we have adopted the approach of "don't work as master for the job you did not work as apprentice".

While continuing our works with this approach, we have entered into the turn-key housing projects and achieved to always be the right address for quality, reliability and peace.

We hope to meet with you and be your permanent address in our new projects..."
